ALL DIMENSIONS IN MM, INDICATES LENGTH X BREADTH X HEIGHT OF THE VALVE.

FLANGE VIEW

SHAFT SEALING

DH

We are using Labyrinth Seal, which is a mechanical seal that fits around the axle or shaft to prevent the leakage of any particles. Generally, Labyrinth Seal is composed of many threads or grooves that are tightly fit inside the casing, thus making difficult for the dust to pass through a long and difficult path.

Labyrinth Seals on rotating shafts provide non contact sealing action by controlling the passage of particles through a variety of chambers by centrifugal motion, as well as by the formation of controlled material vortices.

'Double Labyrinth Seals' are filled with flock pads, and greased on each side of the valve. These are standard with all DH Series valves.

TYPICAL PURGE SEALING
ARRANGEMENT

PURGE SEALING

Grease Purge - For extreme duty, valves can be fitted with a grease purge unit over the labyrinth seal. By creating a grease filled cavity between the seals, it prevents the escape of any dust particles or gases.

Air Purge - When grease cannot be used, air or other gases can be used to purge the seal so all dust particles or product gases are flushed back into the product stream.

CONSTRUCTION / TECHNICAL SPECIFICATIONS

DH

OPENING SIZE	: 150, 200, 250, 300, 350 mm	FLAP TYPE	: Single / Double
FLAP OPENING	: Square	FLAP MATERIAL	: Cast Iron
ACTUATORS	: Gravity / Motorised(M) / Pneumatic (P)	TEMPERATURE	: Build to eminent temperature
SEALS	: Labyrinth Seals	SHAFT	: CS1030
BODY	: Cast Iron	SURFACE TREATMENT	: 50µm Grey Primer
SPECIAL SEALS	: Grease Purge / Air Purge	<150°C (ANVAL STANDARD)	: 50µm Paracryl IFC (B53 Dk. Grey Blue w/ Y14 Golden Yellow for guards.)
CYLINDER TYPE	: Double Acting Cylinder	SURFACE TREATMENT	: 75µm ES600 Zinc Silicate Primer
GEARBOX & MOTOR (FOR MOTORISED)	: Worm Drive / Direct Mounted	(HIGH TEMPRATURE > 150°C)	: 40µm Heatkote Aluminium

NOTE: SPECIAL CONSTRUCTIONS ARE AVAILABLE.

ATEX VERSION IS ALSO AVAILABLE.

APPLICATION

DH

The Anval DH Series Dump valve range is designed in a highly effective manner emphasizing on total sealing, cyclic discharge, with long life and minimal maintenance. These valves are best suited for the following applications.

- Dust Collectors
- Hoppers
- Bag Houses
- Conveyers
- Electrostatic Precipitators handling fly ash, cement, sand, limestone, sawdust.

PRODUCT FEATURES

DH

GRAVITY DUMP VALVE

PNEUMATIC DUMP VALVE

MOTORISED DUMP VALVE

- WIDER RANGE OF OPTIONS - SINGLE / DOUBLE DUMP, GRAVITY / MOTORIZED / PNEUMATIC
- HEAVY DUTY CAST IRON CONSTRUCTION
- MINIMAL MAINTENANCE
- COMPACT AND ROBUST DESIGN
- HIGH QUALITY AIR-LOCK
- CUSTOM BUILT TO SUIT SPECIFIC REQUIREMENTS
